The New Era of Facades

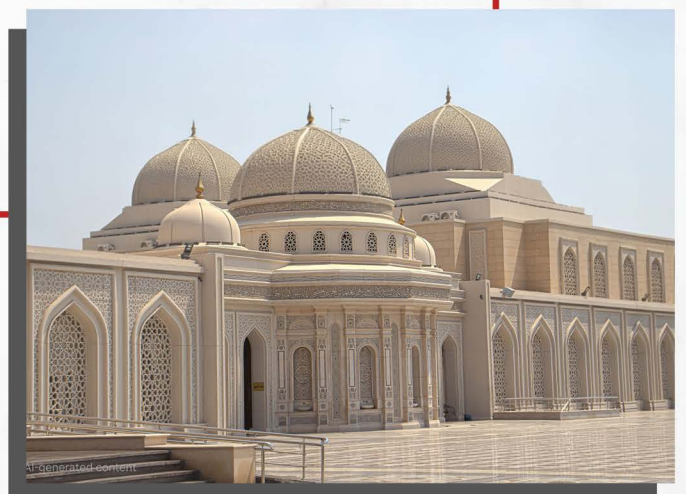

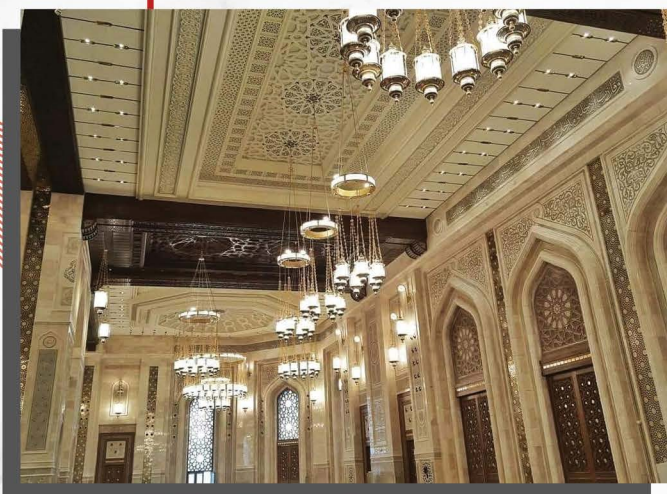

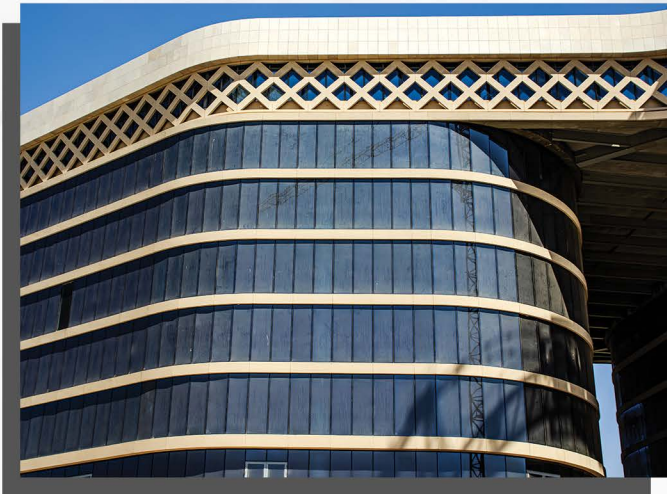

Elegant – Affordable – Durable

MARMOFIBER.COM

ABOUT DEKO EGYPT :

For over 25 years, Deko Egypt Corporation has been a leader in construction solutions , specializing in GFRC and precast GRC products. Today, we continue our journey of innovation with the launch of a revolutionary product : MarmoFiber

WHAT IS MARMOFIBER

MarmoFiber is a unique blend of marble and fiber, designed to provide the timeless elegance of marble with the practicality of modern materials.

- **Stylish & Elegant – Brings the luxury look of marble.**
- **Lightweight – Easier handling and installation.**
- **Durable – Resistant to weather and external factors.**
- **Cost-Effective – More affordable than natural marble.**
- **Innovative – A practical alternative for modern facades.**

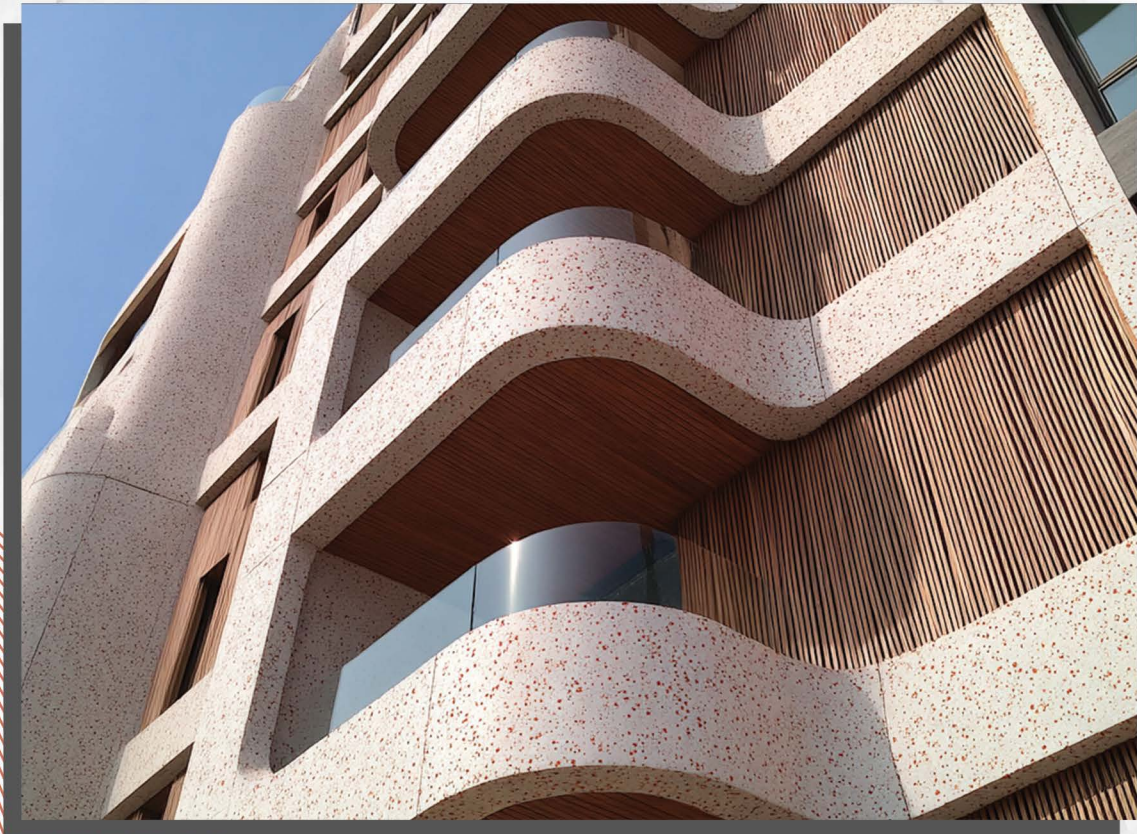

APPLICATIONS

MarmoFiber is the ideal solution for:

- **Building facades**
- **Interior & exterior wall cladding**
- **Decorative architectural elements**

WHY CHOOSE MARMOFIBER

With MarmoFiber, you don't have to compromise between luxury and practicality. It is a smarter, sustainable, and affordable alternative to traditional marble, making it the perfect choice for architects, contractors, and developers.
